R.L.S LEVELLING SYSTEM

A SIMPLE TILE LEVELLING SOLUTION

The Raimondi tile levelling range offers an extensive collection of products that are designed to create evenly spaced and level tiles. The innovation range includes clips and wedges that are suitable for all types of tiling projects, including large format tiles, so professional tilers will benefit from a high-quality finish and quick installation times.

HOW TO CREATE A
PERFECT FINISH

Step 1

Spread the tile adhesive and lay the tile, then position the Raimondi clips beneath the edge of the tile. The clip will act as a spacer when pressed firmly against the tile.

Step 2

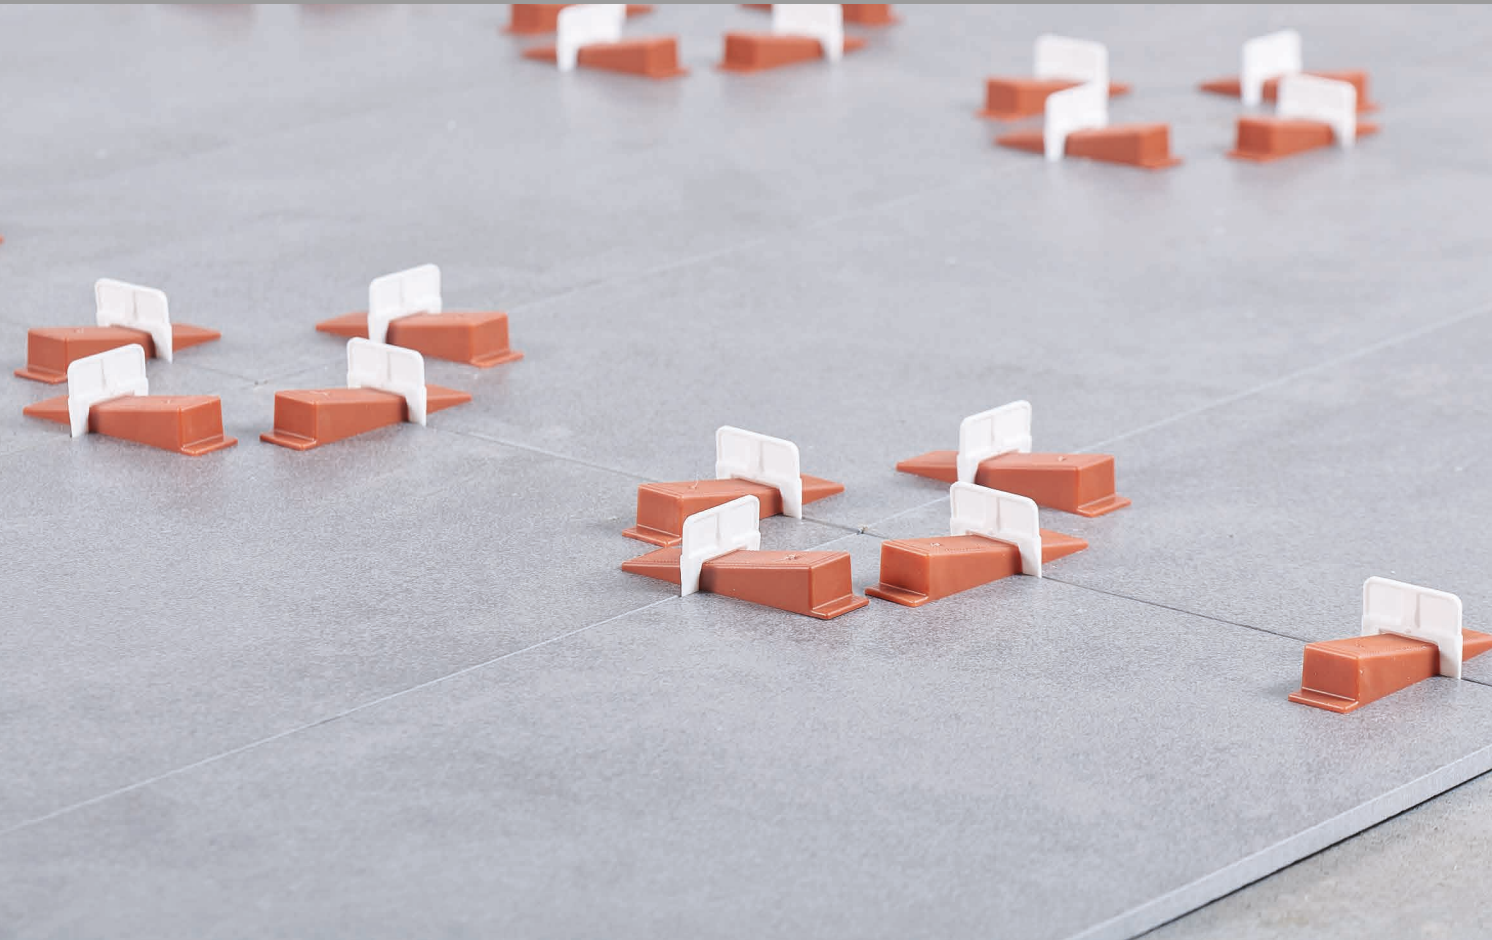

Set the adjacent tile firmly into the adhesive, butted against the Raimondi clip. Then slide the Raimondi wedge through the clip until both tiles are firmly levelled.

Step 3

Once the tiles are locked in place, the clips and wedges need to stay in position until the adhesive sets. The joint width can be adjusted slightly during setting, without disrupting the height of the tiles.

Step 4

Once the adhesive is set, the wedges can be removed using a rubber mallet. The clips should be hit in the direction of the tile joint, where they will dislodge from the breakpoint below the tile ready for grouting.

RAIMONDI Levelling System Kit

- The Raimondi levelling kit is the perfect starter package for professional tilers thanks to its excellent performance and ease of use. The kit is able to level even the heaviest of tiles, so not only will tilers benefit from a professional finish but the installation process will also be much faster.

Stock Code.	Description
1226	The kit includes 250 x clips, 250 x wedges, 1x pair of pliers

RAIMONDI
Fido Hand Support

A comfortable, stable and safe support tool which is ideal for use when spreading adhesive, and placing, adjusting, and cleaning tiles.
Thanks to the ergonomic design, bodyweight is distributed evenly to relieve fatigue, whilst increasing the working area range of the tiler to reduce installation time.
It comes with 4 white removable rubber feet (ant-slip and anti-stain), and it can be used without feet on adhesive already spread without disturbing the adhesive bed or with feet on installed tiles

Stock Code.
1185

RAIMONDI
Sheet Presser Roller

Designed to help lay decoupling mattings and preformed membranes quickly and easily.

- A height adjustable handle
- The roller design ensures full coverage of the matting in the adhesive.
- Comfortable double handles for easy rolling whilst standing.
- Folds away easily for transport
- Can be easily weighted down with a bag of adhesive.

Stock Code.
